AARAV SHARMA

Full Stack Software Engineer & Cloud Systems Developer

Bengaluru, India • +91 98765 43210 • aarav.sharma@skillora.ai • github.com/aarav-sharma • linkedin.com/in/aarav-sharma

PROFESSIONAL SUMMARY

Performance-driven Computer Science Engineer with deep expertise in Python, FastAPI, React, PostgreSQL, and cloud containerization. Proven track record building high-throughput microservices, vector semantic search pipelines with RAG, and scalable reactive frontend dashboards. Strong foundation in data structures, algorithms, distributed systems architecture, and automated CI/CD deployments.

TECHNICAL PROFICIENCIES

Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3, C++
Frameworks & Libraries: FastAPI, React 18, Node.js, Express, SQLAlchemy ORM, Tailwind CSS, Recharts
Databases & Caching: PostgreSQL, SQLite, Redis, FAISS Vector Indexing
Cloud & DevOps: Docker, Docker Compose, Git, GitHub Actions, Linux Shell, AWS EC2/S3, CI/CD Pipelines
Core Competencies: RESTful APIs, Retrieval-Augmented Generation (RAG), Microservices, Object-Oriented Design

FEATURED ENGINEERING PROJECTS

SKILLORA AI — Intelligent Academia-Industry Career Collaboration Platform

Lead Architect & Full Stack Developer | Python, FastAPI, React, PostgreSQL, Vector RAG | 2026

• Designed and engineered high-performance quad-stakeholder career ecosystem serving 1,200+ students and corporate recruiters.
• Implemented semantic vector RAG search with TF-IDF cosine ranking, yielding 98.4% alignment precision between resumes and job postings.
• Built automated ATS parser extracting 20+ technical skill competencies with real-time feedback and diagnostic deficit roadmaps.
• Architected normalized PostgreSQL relational schemas using SQLAlchemy ORM with Bcrypt security and JWT authentication.

Distributed High-Concurrency Microservices Gateway

Backend Developer | FastAPI, Docker, PostgreSQL, Redis | 2025

• Developed asynchronous authentication gateway processing 3,500+ requests/minute with sub-40ms response latency.
• Integrated Redis caching layer decreasing PostgreSQL read query loads by 65% during peak simulated traffic.
• Automated container deployments utilizing multi-stage Docker builds reducing image sizes from 850MB to 110MB.

EDUCATION

National Institute of Technology (NIT) Bengaluru
Bachelor of Technology (B.Tech) in Computer Science & Engineering | CGPA: 8.8 / 10.0 (Graduation: 2027)

CERTIFICATIONS & ACCREDITATIONS

• **Meta Front-End Developer Professional Certificate** (Coursera / Meta)
• **AWS Certified Cloud Practitioner** (Amazon Web Services)
• **Smart India Hackathon Finalist** (Team Byte Squad — SIH26044)
